

INDUSTRY SERVICES

WE DELIVER SOLUTIONS TO KEEP YOUR BUSINESS MOVING.

Hanson's industrial market is focused on industrial processes, controls, optimization and logistics. We engineer operationally efficient plant-supporting infrastructure while developing industrial master plans. We perform site-specific environmental planning and permitting for industrial plants, green/brownfield site development and redevelopment, intermodal, transload, terminals and ports. We work to create the most economical method for the handling, storage and transport of your goods.

Let Hanson help with every step of your project — from market and feasibility analysis, to planning, funding, engineering, management, engineering and design, through implementation to construction management. Your goods need safe and economical processes and infrastructure to get to your customers. We are here to help.

Efficient business solutions

We integrate our extensive market knowledge, financial modeling and operational experience to help our clients develop projects that meet their customers' service needs.

Logistics

We develop and implement logistic solutions across all transportation modes, analyzing transportation networks, commodity substitution alternatives, modal options, material handling systems and markets.

We understand rate structures, incentives and competitive open and interline access — so we can help develop optimal site solutions, locations and transportation alternatives.

Engineering

Our team excels at developing rapid conceptual alternatives; terminal operation modeling; site development and permitting; site, rail and road designs; asset evaluation, terminal infrastructure analysis and improvements; and terminal and rail capital maintenance planning.

Management

We manage projects for logistics and engineering, from concept through completion. We offer a full range of services, from rate analysis, access options, competitive threats, site selection, concept to final engineering design, permitting and regulatory complexities, construction, startup and commissioning to ongoing operations. We know the operational aspects of all transportation modes and how to integrate these requirements into safe, efficient and cost-effective solutions.

Railroad, highway, marine or pipeline?

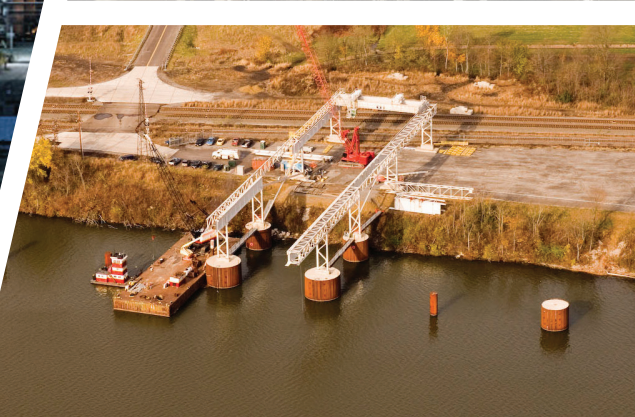

Our team will assess your operations across all modes of transportation, analyze existing and new traffic patterns and develop solutions to improve facilities' layouts and infrastructure.

By understanding your logistical goals and the service characteristics of transportation modes, we can help deliver an efficient and economical movement of freight.

We focus on projects from start to finish

We keep operational and material handling requirements, budgets and timelines in mind to design highly effective solutions. Our team has in-depth knowledge and experience in rail, trucking, warehousing and material handling. We provide services for:

- asset management/inventory
- energy (crude oil, fracking sand by rail)
- financial modeling
- market and logistics strategies
- operation analysis
- operational modeling
- optimization (industrial process, material handling, facility optimization)
- ports
- transloading

Progress requires more than experience. You need a trusted adviser on your team,
one who looks out for you and anticipates your needs.

Your challenges demand innovative solutions. Hanson isn't just responsive —
we're dedicated to solving problems and building a better world.

TRUSTED PARTNERS. PROVEN RESULTS.
