

AIRPORT TERMINALS, HANGARS AND SUPPORT FACILITIES

Your airport is an important economic engine and asset to your community, serving the aviation industry and the public. Your terminals, hangars and support facilities provide essential services, infrastructure and protection for your customers, airlines, tenants and equipment. We understand that your capital improvement projects support operational growth, safety and airline service and are vital to your airport's continued growth.

We'll partner with you to bring your vision to reality, planning and designing terminals, hangars and support facilities that are safe, efficient and cost-effective. We'll also use an innovative approach to plan and develop your airport facilities, incorporating sustainable design principles when possible.

CREATING SOLUTIONS FOR YOUR AVIATION NEEDS

By applying our technical knowledge and creative abilities to every project, we create dynamic yet functional designs for airports of all sizes.

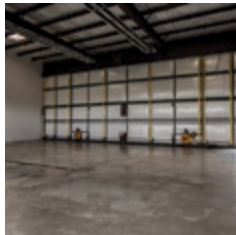

WORKING TO CREATE SOLUTIONS FOR YOU

Hanson's services for airport terminals, hangars and support facilities include:

- airport master plans and layout plans
- building structural assessments
- structural analysis and design
- civil and site design
- commissioning
- construction administration and management
- engineering
- environmental
- land acquisition
- life-safety systems
- mechanical, electrical and plumbing
- planning
- preliminary and final design
- program development
- surveying/obstruction
- sustainable design

Types Of Terminal, Hangar and Support Facility Projects Completed

- administrative and office areas
- airport rescue firefighting facilities
- capital improvement projects
- commercial and industrial development
- control towers
- hangars for aviation operations, maintenance and storage
- maintenance and snow-removal equipment storage buildings
- navigational aids
- noise suppressors
- parking structures
- passenger and freight terminals
- terminal expansions
- security checkpoints

RESPONDING TO YOUR AVIATION NEEDS

Our team has technical qualifications and experience in airport planning, project development, land acquisition, engineering, design and construction. We are qualified in every facet of airport development, including obtaining airport funding. Our firm is familiar with governmental requirements and regulatory measures essential for the successful implementation of airport projects. And we work closely with public and private agencies to ensure compatible integration of airport improvement projects.

Additionally, we provide our clients with environmentally sensitive options through our knowledge and implementation of sustainable design practices. We're proud to be a corporate member of the U.S. Green Building Council — the leading organization dedicated to expanding green building practices through its LEED® (Leadership in Energy and Environmental Design) green building rating system. We know the LEED standards and integrate them into our practices as often as possible.
